Chikkamagaluru, Karnataka 577133 | 6360498383 | vaishugckm@gmail.com

LinkedIn: linkedin.com/in/vaishnavi-g-776981355 | GitHub: github.com/vaishugckm-star

PROFESSIONAL SUMMARY

Detail-oriented Software Developer with hands-on experience in frontend and backend web development, REST API integration, and database management. Proficient in Python, JavaScript, HTML, CSS, Django, and Flask. Skilled in debugging, testing, and Agile methodologies. Strong analytical mindset with experience in data validation, performance analysis, and logical problem-solving. Seeking Software Developer, Frontend Developer, Backend Developer, or Data Analyst roles.

EDUCATION

Bachelor of Engineering in Electronics and Communication

Adichunchanagiri Institute of Technology, Chikkamagaluru, Karnataka | 2022 – 2026

TECHNICAL SKILLS

Languages: Python, Java(basics), JavaScript, HTML5, CSS3

Frontend: HTML, CSS, JavaScript, DOM Manipulation, Event Handling, Responsive Design, Angular

Backend: Django, Flask, REST APIs, API Integration, Authentication, CRUD Operations[basics]

Database & Analysis: MySQL, SQL Queries, Data Validation, MS Excel, PowerPoint

Testing: Manual Testing, Functional Testing, Usability Testing, Postman, API Testing, Bug Tracking

Tools: VS Code, Git, GitHub, ModelSim, Quartus Prime, Agile, SDLC

Concepts: OOP, Data Structures, Algorithms, Problem Solving

PROFESSIONAL EXPERIENCE

Python Full Stack Developer | Dhee Coding Lab

Bengaluru | Feb 2026 – Present

- Developed full-stack web applications using Python, Django, HTML, CSS, and JavaScript
- Designed REST APIs for frontend-backend communication and data exchange
- Managed MySQL databases with optimized SQL queries for data retrieval and storage
- Conducted manual testing including functional, usability, and CRUD validation
- Performed API testing using Postman to ensure endpoint reliability and accuracy
- Debugged frontend and backend issues, improving application performance and UX
- Collaborated in Agile environment with sprint planning and code reviews

RTL Design Engineer | Maven Silicon

Bengaluru | April 2025 – May 2025

- Verified RTL design functionality using simulation tools and validated AHB to APB bridge
- Resolved logical errors in FSM implementation through systematic debugging
- Utilized ModelSim for validation, testing, and output verification of digital designs
- Documented test results to support design optimization and quality assurance

Embedded Systems Developer | Loginware Software Pvt. Ltd.

Bengaluru | Nov 2024

- Verified I/O operations and peripheral behavior for microcontroller-based applications
 - Analyzed system performance metrics and identified errors to enhance efficiency
 - Developed microcontroller applications integrating multiple peripherals for real-time functionality
-

PROJECTS

MedVision AI – Medical Assistant Platform: Architected full-stack platform with React frontend and FastAPI backend. Implemented REST APIs, authentication, database integration, image upload, report generation, and chatbot integration.

FPGA Based Hardware Trojan Detection: Engineered real-time power profiling system to detect hardware trojans. Analyzed abnormal power patterns and implemented detection algorithms for malicious circuit modifications.

Login & Signup Authentication System: Built secure authentication with HTML, CSS, JavaScript. Implemented form validation, input sanitization, local storage session management, and DOM manipulation.

CERTIFICATIONS

Fundamentals of Python – Great Learning, Oct 2024 | Microsoft Excel (Basic to Intermediate) – Great Learning, Oct 2024 | RTL Design Internship (VLSI Design) – Maven Silicon, April – May 2025

ACTIVITIES & HONORS

IEEE Student Congress 2025 Participant | Ideathon Participant – Engineering solutions | Represented college at VTU cultural fests and dance competitions | Active volunteer in college technical and cultural activities
